Sales Customer Support and Administration

AITS Learning Hub training manual and practice workbook

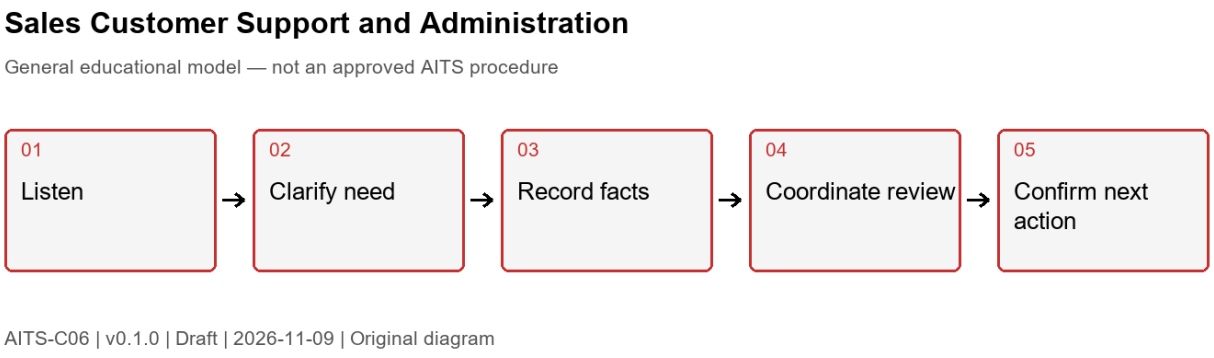

Sample Content — Pending Company Approval

This course introduces the concepts below and gives you exercises to practise them. Use the source notes to distinguish public company information, general guidance and fictional examples. It does not authorize live work or establish internal policy.

Document ID	AITS-C06-MANUAL
Version and status	0.1.0 / Draft
Created and updated	2026-11-09
Audience	Sales, Customer support, Administration
Reviewer	Company to designate
Author	AI-assisted instructional draft
Classification	Mixed; see lesson references and example labels
Duration	About 100 minutes including exercises
Language	English; Thai summaries pending native-speaker review

Learning objectives

- Turn a customer inquiry into an actionable record.
- Acknowledge a complaint and agree a next step without unsupported promises.
- Check scope and assumptions before a quotation is issued.
- Maintain accurate controlled documents and protect confidentiality.

Discover and record requirements

AITS-C06-L01 | 15 minutes | Draft

Objective: Turn a customer inquiry into an actionable record.

Prerequisites: AITS-C01

Begin with the outcome the customer wants and the problem they experience. Use open questions, then confirm specifics: site type, affected area, existing equipment, constraints and desired timing. Read back your understanding in plain language. Do not collect credentials or unnecessary personal data to make the record look complete.

A useful request record distinguishes customer statements from confirmed observations. Include a reference, contact channel authorized for follow-up, scope, open questions and the next responsible action. The fields in this lesson are a generic practice template; actual AITS systems and mandatory fields require company confirmation.

Worked example

Fictional Cedar Office says “we need better cameras.” Ask what must be visible, under what lighting and for what purpose before proposing a specification.

Try it

Create an inquiry record using only synthetic details.

Your response: _____

Compare your reasoning

Request CO-101: improve entrance image under afternoon light. Existing model unknown. Survey and privacy review needed. Customer prefers follow-up through the agreed business channel.

Remember

Ask about outcome before product Read back the requirement Separate statements from verified facts

Thai summary (AI translation, not professionally reviewed): สอบถามผลลัพธ์ที่ลูกค้าต้องการก่อนเสนอสินค้า แยกคำบอกเล่าจากข้อเท็จจริงที่ตรวจสอบแล้ว

References: EX, QA. See source register.

Complaints and professional communication

AITS-C06-L02 | 15 minutes | Draft

Objective: Acknowledge a complaint and agree a next step without unsupported promises.

Prerequisites: AITS-C06-L01

Listen without interrupting, summarize the issue and acknowledge its impact. Ask focused questions to establish what happened and what outcome the customer seeks. Avoid assigning blame before evidence is available. A respectful acknowledgement can be accurate without admitting an unverified cause or promising compensation.

Record the complaint, impact, evidence available, agreed contact method and next update. Escalate to the authorized responsible function when the request exceeds your role. Do not invent a refund rule or service deadline. If language becomes abusive or safety is threatened, seek the applicable supervisor/site response instead of escalating the confrontation.

Worked example

Cedar Office reports that a missed appointment interrupted work. “I understand this disrupted your schedule. I will record the details and ask the responsible team to confirm the next step.”

Try it

Draft a complaint response containing acknowledgement, clarification and a realistic next action.

Your response: _____

Compare your reasoning

I understand the disruption. Please confirm the appointment reference and what occurred. I will ask the responsible team to review it and agree the next update with you.

Remember

Acknowledge impact Clarify facts without blame Agree the next update

Thai summary (AI translation, not professionally reviewed): รับฟังและยอมรับผลกระทบ ตรวจสอบข้อเท็จจริงและส่งต่อเมื่อเกินอำนาจ อย่าสัญญาชดเชยหรือกำหนดเวลาโดยไม่มีอำนาจ

References: EX, QA. See source register.

Quotations and sales coordination

AITS-C06-L03 | 15 minutes | Draft

Objective: Check scope and assumptions before a quotation is issued.

Prerequisites: AITS-C06-L02

A quotation should make the proposed scope understandable: items or services, quantities, relevant specifications, assumptions, exclusions and commercial terms supplied by the authorized process. This course does not set AITS pricing, discounts, tax treatment, approval limits or validity periods. Technical feasibility and commercial authorization are different checks.

Before sending, reconcile the customer request, survey and draft quotation. Look for mismatched quantities, unclear installation scope and unsupported compatibility claims. Use a version identifier so reviewers discuss the same document. If the customer changes requirements, record the change and obtain the necessary revised review rather than editing a signed or approved document silently.

Worked example

A fictional survey calls for six camera locations, but the draft quotation lists four cameras. Flag the mismatch before issue.

Try it

Review a sample quotation checklist with scope, quantity, exclusions, version and approval fields.

Your response: _____

Compare your reasoning

The quantity mismatch is unresolved; the quotation remains a draft. Ask the technical and commercial reviewers to confirm the revised scope.

Remember

Reconcile scope and quantities Separate technical and commercial review Track revisions explicitly

Thai summary (AI translation, not professionally reviewed): ตรวจสอบขอบเขต จำนวน และเวอร์ชันก่อนส่งใบเสนอราคา เงื่อนไขราคาและอำนาจอนุมัติต้องมาจากบริษัท

References: EX, QA. See source register.

Administrative records and handovers

AITS-C06-L04 | 15 minutes | Draft

Objective: Maintain accurate controlled documents and protect confidentiality.

Prerequisites: AITS-C06-L03

Use clear names, stable references and version information so another person can locate the right record. Check dates, quantities, customer identifiers and attachments against the source. A copied spreadsheet can become an uncontrolled duplicate; follow the approved storage and retention rules once supplied. Do not invent a retention period.

Restrict access according to the task, verify recipients and use approved transfer methods. A handover should state status, outstanding questions, evidence location and next owner or requested action. Do not mark a task complete merely because an email was sent. Confirm that the intended outcome or handover acceptance has been recorded by the appropriate person.

Worked example

Two files are named final.xlsx. In the exercise, assign a stable request reference and explicit version, then identify which version is approved.

Try it

Prepare a handover for a draft quotation awaiting technical review.

Your response: _____

Compare your reasoning

CO-101 v0.2 remains Draft; six-location scope awaits confirmation. Evidence is in the authorized case folder. Technical review requested before commercial approval.

Remember

Check records against their source Use explicit versions and status Handover requires a clear next action

Thai summary (AI translation, not professionally reviewed): ใช้เลขอ้างอิง เวอร์ชัน และสถานะให้ชัด ตรวจสอบข้อมูลกับต้นทางและส่งต่องานพร้อมรายการที่ยังค้าง

References: EX, QA. See source register.

Practical scenarios

Vague camera inquiry

Synthetic classroom exercise; not an AITS procedure. Role: Sales trainee

Cedar Office asks for better cameras. Purpose, lighting and existing models are unknown.

Decide: What would you check first, and why? What requires confirmation or authorization? What would you record and hand over?

Appropriate: Ask outcome-based questions and record uncertainty.

Inappropriate: Choose the highest-priced model immediately.

Consequence: Discovery reduces unsuitable proposals.

Missed appointment complaint

Synthetic classroom exercise; not an AITS procedure. Role: Support trainee

A fictional customer reports disruption from a missed visit. The appointment record is available but the cause is unverified.

Decide: What would you check first, and why? What requires confirmation or authorization? What would you record and hand over?

Appropriate: Acknowledge impact, verify facts and request authorized review.

Inappropriate: Promise a refund without authority.

Consequence: Accurate communication avoids a second broken commitment.

Quotation mismatch

Synthetic classroom exercise; not an AITS procedure. Role: Administration trainee

The survey lists six camera locations; quote v0.2 lists four. The document is still Draft.

Decide: What would you check first, and why? What requires confirmation or authorization? What would you record and hand over?

Appropriate: Flag the mismatch and route it for revision before issue.

Inappropriate: Send the draft as approved.

Consequence: Version and scope control prevent a foreseeable dispute.

Use the full scenario JSON for the four-criterion rubric. Score evidence, decision quality, authority/safety and handover from 0–2 each. 0 = absent or unsafe; 1 = partial; 2 = complete and supported. Scores are formative, not certification.

Knowledge check

1. What is the best first response to “better cameras”?

A. Request all passwords | B. Ask what outcome the customer needs | C. Quote the most expensive model

2. How should unverified customer information be recorded?

A. As a customer statement pending verification | B. As a tested fact | C. As an approved design

3. Which data collection principle fits this exercise?

A. Collect every personal detail | B. Copy passwords for convenience | C. Collect what is needed for the task

4. Which response avoids an unsupported promise?

A. I will request review and agree an update | B. You will receive a full refund today | C. We guarantee repair in ten minutes

5. What should complaint notes distinguish?

A. Only the staff opinion | B. Only the customer’s tone | C. Reported impact and confirmed facts

6. A request exceeds your authority. What next?

A. Hide the request | B. Escalate through the verified route | C. Approve it anyway

Use the answer key after attempting the questions. Proposed practice pass mark: 80%. This is not an AITS competency rule.

Knowledge check continued

7. Survey says six cameras; draft quote says four. What next?

A. Send it unchanged | B. Guess that two are free | C. Resolve the mismatch before issue

8. Who can set an AITS discount in this lesson?

A. The AI mentor | B. No authority is established here | C. Every new employee

9. How should a changed customer requirement be handled?

A. Record it and obtain revised review | B. Silently alter the approved file | C. Delete the original record

10. Which file name gives better traceability?

A. misc | B. CO-101-quotation-v0.2-Draft | C. final-final-new

11. Can this course set the company retention period?

A. No | B. Yes, seven years for everything | C. Yes, delete after a week

12. Sending an email always proves a task is complete.

A. True | B. False

Use the answer key after attempting the questions. Proposed practice pass mark: 80%. This is not an AITS competency rule.

Answer key and references

1. B — Discovery should establish the actual requirement.

2. A — The source and confidence of a statement matter.

3. C — Unnecessary collection increases exposure without improving the request.

4. A — The first response commits to an action within the stated role.

5. C — Both impact and evidence matter.

6. B — Authority limits should be respected.

7. C — A mismatch can create an avoidable delivery dispute.

8. B — Company approval rules have not been supplied.

9. A — Revision history preserves the decision context.

10. B — A reference, version and status reduce ambiguity.

11. A — Retention depends on approved policy and applicable obligations.

12. B — The required outcome and acceptance must be checked.
