Welcome to AITS

AITS Learning Hub training manual and practice workbook

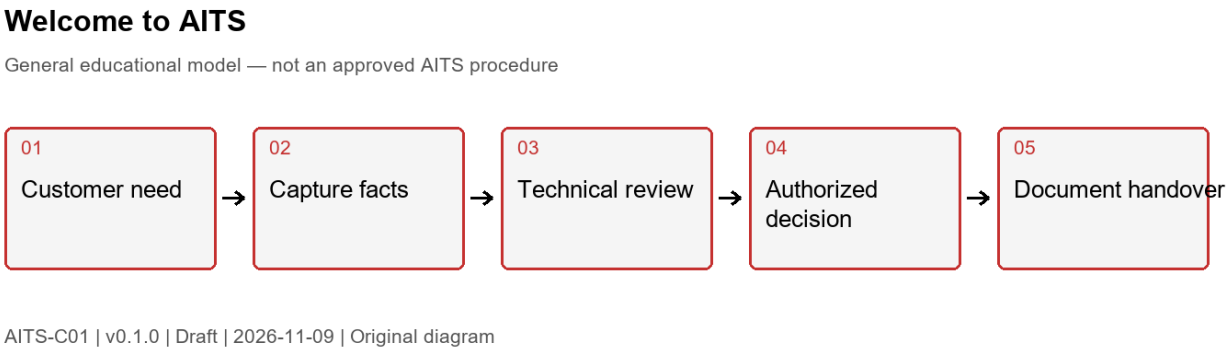

Sample Content — Pending Company Approval

This course introduces the concepts below and gives you exercises to practise them. Use the source notes to distinguish public company information, general guidance and fictional examples. It does not authorize live work or establish internal policy.

Document ID	AITS-C01-MANUAL
Version and status	0.1.0 / Draft
Created and updated	2026-11-09
Audience	All new employees
Reviewer	Company to designate
Author	AI-assisted instructional draft
Classification	Mixed; see lesson references and example labels
Duration	About 100 minutes including exercises
Language	English; Thai summaries pending native-speaker review

Learning objectives

- Explain AITS using supported public facts.
- Match customer needs to relevant service categories.
- Prepare a clear handover without inventing an organization chart.
- Complete a lesson, attempt a quiz and distinguish practice from approval.

Company identity and history

AITS-C01-L01 | 15 minutes | Draft

Objective: Explain AITS using supported public facts.

Prerequisites: None

The official About us page identifies A.I.T.S. Company Limited and dates its founding to Buddhist year 2548, equivalent to 2005. It describes a business concerned with installation quality and professional service. These are public company statements; they do not establish an employee contract or a field acceptance standard.

The public mission text emphasizes service standards, technology, attention to customer needs and responsibility. In this course, these themes introduce the business. Specific targets, individual duties and performance measures require current approved internal documents. Do not infer a reporting line or an employee benefit from marketing language.

Worked example

A fictional new colleague asks whether the company began in 2548 or 2005. Explain the calendar conversion and identify the company page as the source.

Try it

Write a two-sentence company introduction and name one fact that still requires internal confirmation.

Your response: _____

Compare your reasoning

AITS publicly dates its founding to 2005 and describes IT and security installation services. My reporting manager must be confirmed from current internal records.

Remember

Public history: founded in 2005 Service quality and responsibility are public themes Internal duties need approved records

Thai summary (AI translation, not professionally reviewed): ข้อมูลเว็บไซต์ระบุว่าก่อตั้งใน พ.ศ. 2548 หรือ ค.ศ. 2005 ข้อมูลตำแหน่งและผู้บังคับบัญชาต้องยืนยันจากบริษัท

References: AITS, EX. See source register.

Services and customer needs

AITS-C01-L02 | 15 minutes | Draft

Objective: Match customer needs to relevant service categories.

Prerequisites: AITS-C01-L01

AITS publicly lists CCTV, network cabling, security systems, internet, telephone systems, access control, home automation and solar services. Learn what each category addresses before proposing a product. CCTV supports visual monitoring; access control manages entry; network infrastructure connects devices and services.

A customer request may span several categories. Ask about the problem, location, existing equipment and desired outcome. Record uncertainty instead of promising compatibility, price, installation dates or a service level. A technical survey and approved quotation process are separate from this introductory training.

Worked example

Fictional Lotus Workshop wants to see its entrance remotely and restrict staff-door access. CCTV and access control are relevant; connectivity also needs investigation.

Try it

List three discovery questions for Lotus Workshop without collecting passwords.

Your response: _____

Compare your reasoning

What areas need coverage? Who should be allowed through the door? What network equipment and connection already exist?

Remember

Start with the customer outcome Several services may be involved Do not promise unverified compatibility

Thai summary (AI translation, not professionally reviewed): เริ่มจากความต้องการของลูกค้า แล้วเลือกบริการที่เกี่ยวข้อง อย่ารับรองราคา กำหนดส่ง หรือความเข้ากันได้โดยไม่มีข้อมูล

References: HOME, EX. See source register.

Roles and collaboration

AITS-C01-L03 | 15 minutes | Draft

Objective: Prepare a clear handover without inventing an organization chart.

Prerequisites: AITS-C01-L02

No current approved AITS organization chart was located in the inspected materials. This lesson therefore describes functions, not confirmed departments or reporting lines. In a typical service business, customer-facing staff capture requirements, technical staff assess feasibility, administration maintains records, and an authorized reviewer confirms commercial or operational decisions.

A useful handover states the request, known facts, open questions, relevant evidence and next action. It identifies who is being asked to respond without assuming authority they do not have. Ask your supervisor to confirm actual role names and escalation routes. A handover is incomplete when the recipient cannot tell what decision is needed.

Worked example

Synthetic ticket LH-001 says “camera problem.” A better handover says “Entrance camera image missing since 09:00; other views work; model and safe observations attached; technical diagnosis requested.”

Try it

Rewrite “customer unhappy, please fix” as a five-field handover.

Your response: _____

Compare your reasoning

Request: restore entrance view. Facts: missing since 09:00. Evidence: authorized screenshot without people. Unknown: power status. Next action: technical review and agreed update time.

Remember

Functional map is not an organization chart Facts and unknowns travel together Confirm the real escalation route

Thai summary (AI translation, not professionally reviewed): แผนภาพในบทเรียนเป็นตัวอย่างการประสานงาน ไม่ใช่ผังองค์กรที่อนุมัติ ต้องยืนยันช่องทางส่งต่อกับบริษัท

References: EX, APP. See source register.

Learning Hub and your first learning cycle

AITS-C01-L04 | 15 minutes | Draft

Objective: Complete a lesson, attempt a quiz and distinguish practice from approval.

Prerequisites: AITS-C01-L03

Open the Learning Hub with your assigned account, select an assigned course and read the lesson objectives. Work through the explanation and exercise before taking the quiz. Review feedback, revisit the relevant lesson and retry when the platform permits. A recorded completion shows learning activity; it does not authorize electrical work or certify job competence.

The knowledge library separates approved records from clearly labeled samples. Check title, version, source, approval state and applicability before using a document. Course publication and knowledge approval are separate controls. If internal policy is unavailable, ask HR or your supervisor for the current approved document. AI practice cannot supply missing company authority.

Worked example

A sample checklist appears in the library. You may use it for the exercise, but should not treat it as permission to perform a live installation.

Try it

Open one course, complete its first lesson, locate its source note and identify its approval label.

Your response: _____

Compare your reasoning

Record the course and lesson IDs, the visible Draft/sample label and the source reference; confirm completion persists after reopening.

Remember

Read and practise before the quiz Completion is learning evidence Check source, version and approval

Thai summary (AI translation, not professionally reviewed): เรียนและฝึกก่อนทำแบบทดสอบ การเรียนจบไม่ใช่ใบรับรองความสามารถ ตรวจสอบเวอร์ชัน แหล่งอ้างอิง และสถานะอนุมัติ

References: APP, EX. See source register.

Practical scenarios

Explain AITS to a colleague

Synthetic classroom exercise; not an AITS procedure. Role: New employee

A colleague asks when AITS started and who you report to. Public founding date is available; no approved reporting chart is supplied.

Decide: What would you check first, and why? What requires confirmation or authorization? What would you record and hand over?

Appropriate: Use the public date and flag the missing reporting line.

Inappropriate: Invent the manager name.

Consequence: The colleague receives a traceable introduction without an invented authority.

Route a mixed service request

Synthetic classroom exercise; not an AITS procedure. Role: Customer support trainee

Lotus Workshop needs remote entrance viewing and controlled door entry. Existing network details and device models are unknown.

Decide: What would you check first, and why? What requires confirmation or authorization? What would you record and hand over?

Appropriate: Record CCTV, access-control and connectivity requirements for review.

Inappropriate: Promise a model and installation date immediately.

Consequence: A useful handover reduces avoidable resurvey and false expectations.

Choose a reliable learning source

Synthetic classroom exercise; not an AITS procedure. Role: New employee

A sample checklist conflicts with a supervisor-provided approved current document. The sample is Draft and the approved document has an applicable version.

Decide: What would you check first, and why? What requires confirmation or authorization? What would you record and hand over?

Appropriate: Use the approved applicable source and flag the sample conflict.

Inappropriate: Treat the sample as mandatory because it is newer.

Consequence: Authority and applicability are checked before use.

Use the full scenario JSON for the four-criterion rubric. Score evidence, decision quality, authority/safety and handover from 0–2 each. 0 = absent or unsafe; 1 = partial; 2 = complete and supported. Scores are formative, not certification.

Knowledge check

1. Which year matches the published founding year 2548 BE?

A. 2005 CE | B. 2015 CE | C. 1995 CE

2. What can the public website establish?

A. Your leave balance | B. Your direct manager | C. Published company history

3. Which statement needs internal confirmation?

A. The About us page exists | B. My reporting manager is the service director | C. AITS publishes a service list

4. Which category directly addresses controlled door entry?

A. Telephone billing | B. Solar generation | C. Access control

5. What should precede a firm equipment recommendation?

A. A password request | B. Clarification of requirements | C. A guessed installation date

6. Which response is appropriate to an unfamiliar camera model?

A. Record the model and request compatibility review | B. Promise it works with every recorder | C. Reject every unfamiliar model

Use the answer key after attempting the questions. Proposed practice pass mark: 80%. This is not an AITS competency rule.

Knowledge check continued

7. What does the training collaboration map represent?

A. A list of current employees | B. A generic functional example | C. An approved AITS reporting chart

8. Which handover is most useful?

A. Symptoms, scope, evidence and next action | B. Please fix urgently | C. The technician caused it

9. Who should confirm your actual escalation route?

A. A fictional training customer | B. An AI guess | C. An authorized company supervisor or responsible department

10. Does completing a safety-awareness quiz authorize live electrical work?

A. No | B. Yes, automatically | C. Only if the score is 100%

11. What should you check before relying on a library document?

A. Only its attractive design | B. Only its file size | C. Version, approval and applicability

12. An unapproved sample lesson can establish official AITS policy.

A. True | B. False

Use the answer key after attempting the questions. Proposed practice pass mark: 80%. This is not an AITS competency rule.

Answer key and references

1. A — For this Thai calendar date, subtract 543.
2. C — Marketing information supports public facts, not personal employment details.
3. B — A reporting relationship requires a current approved organizational record.
4. C — Entry permissions are an access-control requirement.
5. B — Requirements inform a suitable technical review.
6. A — Compatibility needs evidence from the relevant documentation.
7. B — No approved current organizational structure was found.
8. A — Observable facts support the next investigation.
9. C — Internal authority must come from the company.
10. A — Task authorization and practical competence require separate controls.
11. C — A document can be clear but obsolete or unapproved.
12. B — Unknown internal policy must remain unknown.
